REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record, including the documents cited on the Information Disclosure Statement filed March 4, 2005 (which have been considered by the Examiner) do not disclose a steering system for a vehicle, including a steering angle defined, at least in part, by an input from an operator; at least one sensor adapted to monitor the roll of a vehicle body and a height of the center of gravity of the vehicle from a given point; and a controller in communication with the sensor and connected to a motor, the controller adapted to adjust the supplementation of the input to the steering angle from the operator based upon the amount of roll of the vehicle body as monitored by the sensor, and adapted to supplement the steering angle when the amount of roll of the vehicle body as monitored by the sensor exceeds calculated maximum value defined at least in part, by the height of the center of gravity of the vehicle, thereby reducing the amount of roll of the vehicle body. The prior art also fails to disclose a method of controlling roll over of a motor vehicle, comprising the steps of: monitoring an actual amount of roll of a vehicle body; monitoring a height of the center gravity of the vehicle; determining a maximum roll value based, at least in part, on the height of the center of gravity of the vehicle; comparing the actual amount of roll of the vehicle body to the maximum roll value; and controlling a steering angle of a wheel of the vehicle based on the comparison of the actual amount of roll of the vehicle body to the maximum roll value. The prior art further fails to disclose a method of controlling roll over of a motor vehicle, comprising the steps

of: determining an actual amount of roll of a vehicle body by measuring the relative difference between the deflection of a suspension between two sides of the vehicle; determining a height of the center gravity of the vehicle by monitoring the weight of the vehicle by measuring the relative height of the suspension of the vehicle relative to a given point; determining a maximum roll value based, at least in part, on the height of the center of gravity of the vehicle; comparing the actual amount of roll of the vehicle body to the maximum roll value; and controlling a steering angle of a wheel of the vehicle based on the comparison of the actual amount of roll of the vehicle body to the maximum roll value, thereby reducing the actual amount of roll of the vehicle body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application on March 4, 2005. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the Request for Continued Examination has been processed and the Information Disclosure Statement filed therewith has been considered.
